3/19/76

Dear Jerry,

When the appearance with Robert at Hunter was scheduled for the 17th as I believe I told you, I arranged to do other work when there. But I also had to hurry back to be ready to work with JIL on an FOIA affidavit. I thought I might have to be in New York four days. It turned out I could finish in two.

Because the various supports I wear have never been right and had become more wrong I could not stay when it was not necessary to speed re-examination and correction. So, I went up on Sunday and worked that and Monday nights until after midnight. I returned on an early train Tuesday.

At Dell it went rather well. They have no records of two printings of which I have copies and of getting 8250 copies of the original Whitcomb printing of which they paid for only 500.

They are to be searching for other records and I'll go up before the new date at Hunter, 4/21.

I'm working on another book.

For it I need the Mabel Ellis Johnson memo that says she worked for the State Department. I had a copy but can't find it. I know you have one so I'd appreciate a copy clear enough to reproduce.

If you got a quotable reaction to your use of this at the Hore convention, I'd like to use that, too.

If you can send this, to keep me from forgetting please return this with it or attach a note that says FW'7. This will tell me where I want to do theincorporating and use the facsimile.

Thanks and best,

Harold
